## WORK EXPERIENCE

**INFOR PSSC** Taguig City
Software Engineer 2025 – 2026

- Delivered enterprise ESG application enhancements while leading a technical debt remediation initiative that increased unit test coverage from **20% to 85%** using **AI-assisted spec-driven development**.
- Introduced **AI-assisted, specification-driven development** workflows, contributing to a **100% sprint delivery rate**, while optimizing high-traffic APIs through **Redis** caching to improve application performance.
- Modernized enterprise backend services by migrating legacy **Java EE (javax)** components to **Jakarta EE**, ensuring compatibility with modern Java runtimes and reducing technical debt.

**MANULIFE IT DELIVERY CENTER ASIA** Makati City
Fullstack Engineer 2020 – 2025

- Led a cross-functional regional squad to deliver end-to-end, customer-facing web applications for the APAC market, utilizing **Angular** and **Java Spring Boot**, collaborating closely with Product Owners, Business Analysts, QA, and DevOps.
- Designed and developed a reusable **JSON-driven dynamic form framework** and Angular component library, reducing enterprise form development from **weeks to hours** while standardizing implementation across Manulife projects.
- Designed and implemented REST-based microservices supporting applications deployed on **Azure** environment.
- Deployed production features and fixes using **Jenkins** and resolved **P1–P3** production incidents by analyzing application logs and performance metrics with **Kibana** and **New Relic**, ensuring timely restoration of critical business services.
- Led technical initiatives including **Angular framework upgrades**, **security vulnerability remediation**, application performance improvements, and end-to-end delivery of enterprise features across customer-facing applications.
- Mentored engineers through onboarding, knowledge transfer, brownbag sessions, and technical coaching, while conducting technical interviews to support team growth.

**UST GLOBAL** Taguig City
Fullstack Engineer 2018 – 2020

- Handled application deployments to production environments using **Team Foundation Server (TFS)** (now known as Azure DevOps) and **Internet Information Services (IIS)**.
- Developed and maintained web and desktop applications across multiple projects using technologies such as **Java Spring Boot, AngularJS, Angular, JSP, C#, and Java Swing**. Delivered scalable and user-friendly solutions tailored to business requirements, contributing to improved system performance and user satisfaction across platforms
- Developed and optimized stored procedures and complex SQL queries for **MySQL** and **Oracle** databases, seamlessly integrating them with web applications

**CONVERGYS** Quezon City
Technical Service Representative 2016 – 2018

- Resolved complex technical issues for over 2,000 customers, maintaining a 90% satisfaction and resolution rate, establishing a rigorous foundation in high-pressure troubleshooting and technical communication.

## PROJECTS

**DENR BOOKING SYSTEM** 2024

- Developed a ground-up mountaineering booking ecosystem for environmental resource management. Built admin dashboard and public booking portal, featuring calendar booking and QR code tickets to handle seasonal traffic

**U-TRADE PLATFORM** 2023

- Deployed and maintained an investment web application using **Angular, Java Springboot, Postgres, AWS,** optimizing cost and performance for a small-to-medium investment platform

## EDUCATION

**STI COLLEGE FAIRVIEW** Quezon City
Bachelor of Science in Computer Engineering Jun 2011 - May 2016
Academic Awardee
